## PRODUCT CATALOG

[www.paradeplastics.com](http://www.paradeplastics.com)

The Affinis Group holds and manages a select group of food service equipment and supplies manufacturers. Since our formation in 2001, Affinis has built a reputation for quality and efficiency with brands like SaniServ and SECO Select. Adding to this line-up, we proudly introduce our newest product line: Parade Plastics.

As one of the leading providers in injected plasticware, the overriding goal at Parade Plastics is to continually delight our customers with innovative products, personal attention and competitive prices.

We offer more than 100 different items in seventeen standard color options. In addition to standard options, we carry items unique to our industry. Our 20, 24, 32, and 40-quart food storage containers are a few examples of exclusive Parade Plastics products.

Although Parade Plastics is a new name in the industry, our products have quickly gained a reputation for quality. They are a staple in restaurants and stores nationwide. Through designated distributors and food service equipment representatives, our products are available to a wide variety of customers, including: restaurants, healthcare institutions, schools, corrections facilities, casual and family dining establishments, military halls, hotels, casinos, cruise lines, and theme parks.

At Parade Plastics, we produce exceptionally strong, safe products. Most products are manufactured using 100% BPA-free material. All products are made from FDA approved plastic resins. All items are extensively tested for durability and consumer safety.

The Parade Plastics line of high-quality products is manufactured in the United States.

## Why buy Parade Food Storage Products?

Parade offers a wide variety of shapes and sizes to choose from. These products are capable of storing wide volume ranges from 2 quarts to 88 quarts.

Most pieces are offered in clear polypropylene, as well as natural white polyethylene. The polypropylene versions are microwavable and can withstand temperatures up to 230 degrees Fahrenheit. The polyethylene versions are freezer safe and can withstand temperatures as low as -40 degrees Fahrenheit.

Many Parade food storage products are offered in a variety of colors which comply with the HACCP guidelines including: blue, yellow, red, green, natural white, and clear.

Parade utilizes high quality FDA approved materials, and we never substitute materials to reduce costs. Our products are dishwasher safe. Most are produced from BPA free material.

Stacking lugs are provided on food storage products eliminating air vacuums. This feature helps to prevent bacteria growth when the product is stacked reducing the risk of food borne illness.

Parade food storage products are impervious to food acids.

Parade food storage products feature re-curved handles. This ergonomic feature reduces stress on hands and wrists providing safe and comfortable handling of heavy loads.

Seamless interiors provide easy, efficient cleaning ensuring food is not trapped in crevices. This feature also helps to prevent bacteria growth when the product is stacked, reducing the risk of food borne illness.

Parade Plastics is the only manufacturer that offers 20 quart, 32 quart, and 40 quart sizes.

Larger food storage containers incorporate reinforcing ribs under the rims for additional strength and rigidity. This feature reduces the risk of twisting, bowing, and warping.

Parade food storage products are price competitive.

# FOOD STORAGE

## Parade Food Storage Features

Reinforced rims for strength and rigidity

Ergonomically designed recurved handle for comfortable handling of heavy loads

Many Parade food storage products are offered in a variety of colors which comply with the HACCP guidelines including: blue, yellow, red, green, natural white, and clear

Most pieces are offered in clear polypropylene, as well as natural white polyethylene

Stacking lugs for improved air flow and reduced bacteria growth

# ROUND FOOD STORAGE CONTAINERS

Parade Plastics' round food storage containers are designed for all segments of the food service industry. From Casual Dining to White Tablecloth; all segments of the food service industry need food storage containers.

Our natural round food storage containers are manufactured from FDA approved plastic resins. We only use the highest quality materials and never substitute to reduce costs.

Parade Plastics' containers feature re-curved handles molded into the container. Designed for maximum comfort, efficiency, safety, and ease of use, especially in the work place, this ergonomic feature reduces stress on the fingers and hands while lifting heavy loads.

Parade containers are durable, light weight, and do not contain BPA's. They incorporate stacking ledges that prevent them from sticking together. This feature greatly reduces the drying time and reduces the ability for bacteria to grow. They are molded seamlessly and are NSF certified.

Our natural food containers can withstand temperatures between -40 and 180 degrees Fahrenheit. This feature makes these containers ideal for refrigerator and freezer use or for sauces poured straight out of the pan. All storage containers are dishwasher safe.

# TRANSLUCENT POLYPROPYLENE ROUND FOOD STORAGE CONTAINERS

Parade Plastics' round food storage containers are designed for all segments of the food service industry. From Casual Dining to White Tablecloth, all segments of the food service industry need food storage containers.

Our translucent round food storage containers are manufactured from FDA approved plastic resins. We only use the highest quality materials and never substitute to reduce costs.

Parade Plastics' containers feature re-curved handles molded into the container. Designed for maximum comfort, efficiency, safety, and ease of use, especially in the work place, this ergonomic feature reduces stress on the fingers and hands while lifting heavy loads.

Parade containers are durable, light weight, and do not contain BPA's. They incorporate stacking ledges that prevent them from sticking together. This feature greatly reduces the drying time and reduces the ability for bacteria to grow. They are molded seamlessly and are NSF certified.

Our translucent containers have graduation lines for both liters and gallons. They offer contact clarity for easy identification of the products stored inside. Available for each size are non brittle, easy to use, tight fitting lids. Parade's translucent polypropylene containers are designed for use in a wide range of temperatures from 0 degrees Fahrenheit to 230 degrees Fahrenheit.

# STORAGE CONTAINERS ROUND LIDS

Parade Plastics' food storage container lids are made from durable, high quality polyethylene. One of the unique aspects of our lids is that one lid may be capable of fitting multiple containers, even the containers of our competitors (example H3120600 fits 16, 20, and 24 quart containers). The low density feature allows our lids to be non-brittle and flexible. The lips are angled in to form around your food storage container, creating a seal-tight effect to help lock in and conceal freshness.

The temperature range for these polyethylene lids are from -40 degrees up to 180 degrees Fahrenheit. This feature makes these lids, combined with our high density natural containers, ideal for refrigerator and freezer storage. All food storage lids feature an extended tab so that they can easily be removed from the container.

To comply with the HACCP coding system, Parade now offers our container lids in multiple colors. This coding system was set in place to help reduce the risk of cross contamination of different food products. These lids can be helpful in designating certain containers for the appropriate food types: red for beef; yellow for poultry; blue for seafood; green for produce.

All food storage lids are manufactured from FDA approved plastic resins, are NSF certified, and are dishwasher safe.

# NATURAL SQUARE FOOD STORAGE CONTAINERS

Parade Plastics' square food storage containers are designed for all segments of the food service industry. From Casual Dining to White Tablecloth, all segments of the food service industry need food storage containers.

Our natural square food storage containers are manufactured from FDA approved plastic resins. We only use the highest quality materials and never substitute to reduce costs.

Parade Plastics' larger square containers feature easy grip handles molded into the side of the container. These handles are designed for maximum comfort, efficiency, safety, and ease of use, especially in the work place.

Parade containers are durable, light weight, and do not contain BPA's. The large lip on the side of the container will prevent them from sticking together when nesting. Unlike round containers, the square and rectangular shapes allow them to fit comfortably side by side, helping to create space efficiency.

Our natural food containers can withstand temperatures between -40 and 180 degrees Fahrenheit. This feature makes these containers ideal for refrigerator and freezer use, or for sauces poured straight out of the pan. All storage containers are dishwasher safe.

# STORAGE CONTAINERS SQUARE LIDS

Parade Plastics' food storage container lids are made from durable, high quality polyethylene. One of the unique aspects of our lids is that one lid may be capable of fitting multiple containers (example H3181200 fits 12 and 18 quart containers). The low density feature allows our lids to be non-brittle and flexible. The lips are angled in to form around your food storage container, creating a seal-tight effect to lock in and conceal freshness.

The temperature range for these polyethylene lids are from -40 degrees up to 180 degrees Fahrenheit. This feature makes these lids, combined with our high density natural containers, ideal for refrigerator and freezer storage. All food storage lids feature an extended tab so that they can be easily removed from the container.

To comply with the HACCP coding system, Parade now offers our container lids in multiple colors. This coding system was set in place to help reduce the risk of cross contamination of different food products. These lids can be helpful in designating certain containers for the appropriate food types: red for beef; yellow for poultry; blue for seafood; green for produce.

All food storage lids are manufactured from FDA approved plastic resins and are dishwasher safe.

# FOOD STORAGE BOXES

Parade Plastics' food storage boxes are an affordable alternative to the high cost of polycarbonate food storage boxes. Our boxes feature more reinforcing ribs under the rim than other brands. These ribs add more strength to the rim which reduces twisting, bowing, and tears. The four stacking lugs on the sides prevent sticking when nested.

Parade Plastics' food storage boxes feature re-curved handles molded into the box. This design allows for maximum comfort, efficiency, and safety in the work place. This ergonomic feature also reduces stress on the fingers and hands while lifting heavy loads.

Parade food storage boxes incorporate a textured outer surface which resists marring for a long and attractive service life. Thicker plastic corners reduce the possibility of wearing holes in the bottom, extending the life of the box. The inner surface of a Parade box is very smooth with a wide radius for easy cleaning.

Parade food storage boxes are available in 6 different colors and four sizes. To correspond with HACCP guidelines, you may order our food storage boxes in blue for seafood, yellow for poultry, green for produce and red for beef. They are also available in natural polyethylene and clear polypropylene. Optional contoured lids provide for food storage boxes to be stacked on top of one another without leaning or collapsing.

# 5" AND 7" FOOD STORAGE CONTAINER LIDS

Parade Plastics' food storage container lids are made from durable, high quality polyethylene. One of the unique aspects of our lids is that one lid may be capable of fitting multiple containers (example H3521258 fits 5" and 7" standard duty or heavy duty food storage containers). The food storage container lid is denser than our standard round and square lids. This was designed to support the extra weight generated by other containers placed above it.

The temperature range for this polyethylene lid is from -40 degrees up to 180 degrees Fahrenheit. This feature makes these lids, combined with our high density containers, ideal for refrigerator and freezer storage. These lids also feature a smooth interior surface that allows for easy cleaning and sanitation. The outer surface is textured, giving this item a long and attractive service life.

To comply with the HACCP coding system, Parade now offers our container lids in multiple colors. This coding system was set in place to help reduce the risk of cross contamination of different food products. These lids can be helpful in designating certain containers for the appropriate food types: red for beef; yellow for poultry; blue for seafood; green for produce.

All food storage lids are manufactured from FDA approved plastic resins, are NSF certified, and are dishwasher safe.

Made in USA

# 48 QUART FOOD STORAGE CONTAINERS

The 48 quart food storage container is the perfect choice for any food organization, no matter how large or small. The 48 quart container is molded from the extremely durable, yet flexible, low density polyethylene. This material makes this product resistant to tearing, breaking, food odors and food acids. This product features a smooth interior surface for easy cleaning and a fluted design that gives it a unique attractive appeal. The rim on this container features reinforcing ribs spaced every three inches. These ribs provide the rim with added strength and helps to prevent twisting and warping. A large opening towards the top of the container allows easy placement and retrieval of food products.

Quarter inch thick steel bales can be purchased as an accessory to the container and are assembled at the factory. These pieces are ideal when dealing with heavy loads. The handle snaps over the lid, keeping it secured to the container. A large gap between the container and the handle keeps your hands from rubbing the sides of the container during transportation.

The 48 quart food storage container has a temperature range of -40 degrees to 180 degrees, making it ideal for refrigerator and freezer storage. The 48 quart container is made from FDA approved plastics and is NSF certified.

## Why buy Parade Trays?

Parade offers a large variety of sizes, shapes, and colors. Choose from the round, high profile seafood tray to the heavy duty, 18 X 26 bun tray to create an appealing presentation for all your food displays. All trays are available in eleven standard colors.

Bun and display trays are available in full and half size models.

Parade utilizes high quality FDA approved materials. We never substitute materials to reduce costs. Our trays are NSF certified and dishwasher safe. Most are produced from BPA free material.

Quick drying stacking lugs are standard on all Parade trays. This feature helps to prevent bacteria growth when the product is stacked, reducing the risk of food borne illness.

Most trays are available in an economy version for companies with tight budgets.

Parade trays are impervious to food acids and are self healing when scratched. Unlike other brands, Parade trays will not split or fray.

All of the traditional, comfort grip and display trays are made utilizing a special molding process. This process makes Parade trays less prone to distortion, providing one of the flattest trays in the industry.

Parade trays can be utilized in schools, hospitals, hotels, chain restaurants, correctional facilities and many other organizations located throughout the food service industry.

Parade serving trays feature a molded-in, non-skid liner to prevent slipping, spilling, and breaking. They are available in four NSF certified sizes.

All Parade trays are manufactured to withstand temperatures of 230 degrees Fahrenheit.

Parade trays are price competitive.

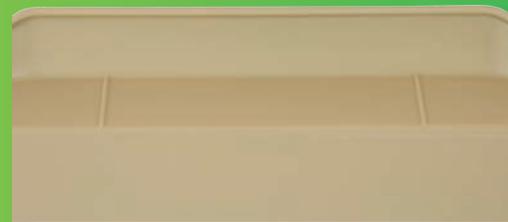

# TRAYS

## Parade Tray Features

Compartment tray reinforced rolled rim and stacking lug

Molded-in comfort grip handle

Seafood tray with high profile rolled rim and stacking lug

Self healing textured surface available on many models

# TRADITIONAL TRAYS

Parade Plastics' traditional series fast food trays are designed for quick service restaurants, cafeterias, food courts, schools and healthcare operations.

Traditional trays are manufactured from FDA approved plastic resins. We use only the highest quality materials and never substitute to reduce costs.

Parade trays are durable, light weight, and do not contain BPA's. They are impervious to food acids and are self healing when scratched.

Traditional trays are manufactured utilizing a special molding process that makes them less prone to distortions; therefore, they remain flatter than other competitor's trays.

Unlike some of our competition, Parade trays are dishwasher safe and have an attractive and practical basket weave surface that will not split or fray. Additionally, traditional style trays feature sanitary stacking lugs for faster, bacteria free drying.

# COMFORT GRIP TRAYS

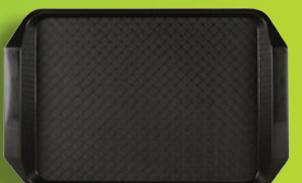

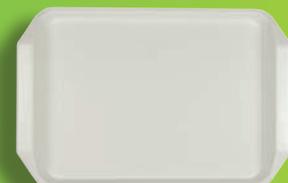

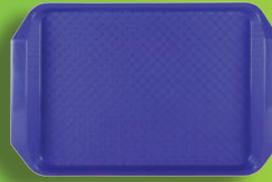

Parade Plastics' Comfort Grip series fast food trays are designed for quick service restaurants, cafeterias, food courts, schools and healthcare operators.

Comfort Grip trays are manufactured from FDA approved plastic resins. We use only the highest quality materials and never substitute to reduce costs.

Parade trays are durable, light weight, and do not contain BPA's. They are impervious to food acids and are self healing when scratched. Comfort Grip trays are manufactured utilizing a special molding process that makes them less prone to distortions; therefore, they remain flatter than other competitor's trays.

The feature that separates the Comfort Grip tray from the traditional tray are large, easy to grip handles located at the ends of the tray. These handles allow for a firm, steady grip. The tip of the handle rolls down to keep your fingers from slipping. This will help you to reduce messy spills.

Unlike some of our competition, Parade trays are dishwasher safe. They have an attractive and practical basket weave surface that will not split or fray. Additionally, Comfort Grip style trays feature sanitary stacking lugs for faster, bacteria free drying.

Made in USA

# COMPARTMENT TRAYS

Parade Plastics' compartment trays are extremely durable, scratch resistant, and are less expensive than traditional melamine trays. These trays can be manufactured from two different types of materials: ABS and polypropylene. They feature six separate compartments for storing and organizing different food products. The six compartments are molded deep into the tray to prevent food from mixing with one another. These trays feature stacking lugs for easy separation when nesting, allowing air to flow in between them creating a less suitable environment for bacteria. Their design and small stature will let them sit side by side in a dishwasher, cutting down on chemical and water cost.

These two materials have special qualities that differentiate them from one another. While both trays are designed to have a high resistance to food acids and harsh chemicals, the ABS version is extremely durable and more rigid when compared to polypropylene. However, good chemical composition allows polypropylene to react well with colors, giving you more color options. It is also less expensive than the ABS version making it perfect for tight budget organizations. Both trays have a temperature tolerance of anywhere between 0 to 180 degrees and are less expensive than the polycarbonate versions.

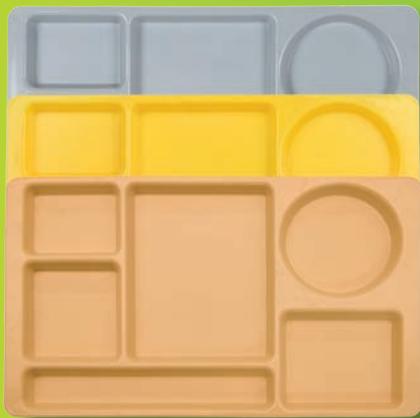

Our compartment trays come in two different styles and up to ten standard color options (4 for ABS and 6 for polypropylene). All compartment trays are made from FDA approved plastic resins. All compartment trays are dishwasher safe.

Made in USA

# DISPLAY AND BUN TRAYS

These sturdy trays are made of rugged, high impact polypropylene making them extremely durable. To support extra weight, these trays have a thick, layered lip surrounding the body so it can be placed on racks and carts without the worry of breakage. The display tray has a sleek, smooth interior surface allowing for easy cleaning, while the bun tray features a basket weave design that gives it a unique and elegant look. The textured surface will also help to prevent the product from sliding during transportation.

The display tray comes in three different sizes allowing options based on your display and product quantities. The sizes currently offered for the display tray are: 18 x 26, 13 x 18, and 18 x 9. These trays will not fray, chip, or discolor. Both display and bun trays are offered in three colors to provide your location with a more cheerful and colorful atmosphere.

Their sturdiness and extreme tolerance to heat (up to 230 degrees) make these trays a great companion for any heated or proofing cabinets. The ideal usage for these trays are bakeries and delis, but they can be used anywhere where large quantities apply. Both trays are dishwasher safe and NSF certified.

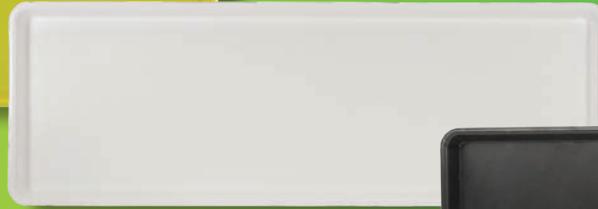

Made in USA

These trays are truly unique items in the food service industry. Unlike metallic seafood trays, this product is made from rugged yet durable polypropylene. This will make for a more cost effective item without losing durability and reliability. They will not dent or tarnish and the plastic feature allows for a quieter and more comfortable atmosphere.

The seafood trays are designed with high rising sides to hold the ice that is being served with seafood. These sides are designed to contain the water accumulated from melting ice, allowing food to be kept cool during transportation and consumption. The sides of the tray form a curved lip to assist in giving a firm and secure grip, while also allowing the tray to be held from multiple angles.

Even though this tray was originally designed to hold and contain seafood, it can be used for other products. The plastic polypropylene can withstand temperatures of up to 230 degrees. The rugged plastic design will not conduct heat like the metallic version, making this item safer to the touch. The seafood tray is an exceptional item for serving foods such as pasta, pizza, and even hamburgers and fries. The high rising sides will help to reduce messy spills, keeping your restaurant cleaner and more efficient.

The seafood tray is offered in one size and two colors. All seafood trays are manufactured from FDA approved plastic resins. They are NSF certified and dishwasher safe.

## Why buy Parade Drinkware?

Parade utilizes high quality FDA approved materials. We never substitute materials to reduce costs. Our products are dishwasher safe. Most are produced from BPA free material.

Stacking lugs are provided on tumblers eliminating air vacuums. This feature helps to prevent bacteria growth when the product is stacked reducing the risk of food borne illness.

Parade offers many different colors to provide an attractive and elegant display in 12 standard colors.

All tumblers are made utilizing high quality S.A.N. materials. They are resistant to chipping, cracking, and warping. A large smooth lip helps to ensure lipstick and other particles are easily removed when washing.

Parade drinkware products are impervious to food acids.

An attractive design on the textured tumblers resists scratches allowing for a long life span.

Liquid dispensers are available in four standard sizes. All liquid dispensers come standard with a no leak faucet and seal tight lid so product can be stored in the refrigerator for later use. Liquid dispensers can also be used for hand washing stations where running water may not be available.

Parade drinkware products can be utilized in schools, hospitals, hotels, chain restaurants, correctional facilities and many other organizations throughout the food service industry.

Parade drinkware products are price competitive.

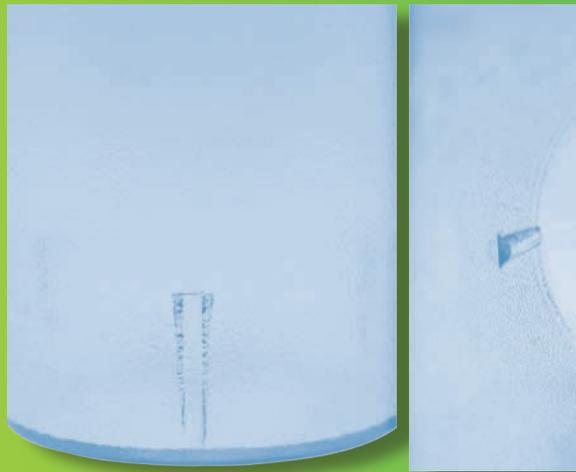

# DRINKWARE

## Parade Drinkware Features

Liquid dispenser no leak no drip faucet

Tumbler stacking lugs

Tumblers are available in a variety of colors and sizes ranging from 5 to 32 ounces

# TEXTURED TUMBLERS

Parade's Textured Tumblers feature a smooth rim so that lipstick and food will not stain the tumblers. The sides have a smooth pebble like surface to resist everyday use and abuse. Their tapered sides and stacking lugs prevent them from sticking together when stacked.

Our textured tumblers are manufactured out of S.A.N. and offer a low cost option over polycarbonate tumblers.

These tumblers are perfect for pool side, health care, and high volume operators.

Our textured tumblers are available in seven sizes and four standard colors. Additional colors and custom decorating are available upon request. Please ask your Parade representative about pricing and lead times for custom tumblers.

# LIQUID DISPENSERS

Parade Plastics' liquid dispensers are a perfect commodity for any restaurant or in home use. Made of rugged, durable polyethylene, the containers feature a seamless construction for safe and easy cleaning. They can be used to dispense lemonade and ice tea or they can be used to set up a hand washing station where running water may not be available. These dispensers can give your kitchen a better appeal by hiding unsightly detergents or cleaners.

Parade offers four different types of liquid dispensers. Choose between the new twelve and eighteen quart rectangular dispensers or the standard twelve and twenty four quart round dispensers. All of Parade's liquid dispensers come standard with a no leak faucet and a seal-tight lid so product can be stored in the refrigerator and re-used if necessary. Our round liquid dispensers feature re-curved handles allowing for a comfortable and safe grip.

As an optional feature, Parade Plastics also supplies stands for round and rectangular dispensers. All liquid dispensers are manufactured from FDA approved plastic resins. They are dishwasher safe.

## Why buy Parade Food Preparation Products?

Parade utilizes high quality FDA approved materials. We never substitute materials to reduce costs. Our food preparation products are NSF certified and dishwasher safe. Most are produced from BPA free material.

Stacking lugs are provided on food preparation products eliminating air vacuums. This feature helps to prevent bacteria growth when the product is stacked reducing the risk of food borne illness.

Parade food preparation products feature re-curved handles. This ergonomic feature reduces stress on hands and wrists providing safe and comfortable handling of heavy loads.

Many Parade food preparation products are offered in a variety of colors including: blue, yellow, red, green, natural white, and clear. The offered colors also comply with the HACCP guidelines.

Parade food preparation products are impervious to food acids.

All food preparation items are designed with a textured outer surface to prevent scratching and marring. Seamless interiors provide easy, efficient cleaning that ensures food is not trapped in crevices.

Parade food preparation products can be utilized in schools, hospitals, hotels, chain restaurants and correctional facilities.

Parade food preparation products incorporate reinforcing ribs under the rims for additional strength and rigidity. This feature reduces the risk of twisting, bowing, and warping.

Parade food preparation products are price competitive.

# FOOD PREPARATIONS

## Parade Food Preparation Features

Parade's colanders come in six standard colors complying with HACCP guidelines. The lid is contoured to fit the bottom of the box allowing these products to be securely stacked on top of each other.

# COLANDER AND MARINADE SETS

Parade Plastics' colanders and marinade sets are designed for all segments of the food service industry. They are manufactured from rugged, high quality polyethylene and are resistant to breaking, cracking, chipping, and warping. These sets feature a smooth inner surface for easy cleaning and all corners and ends are rounded to keep food from accumulating in any crevices. The outer surface of the set is textured to prevent scratching and marring. The plastic corners are molded thicker to reduce wear and tear, extending the life of this product.

Our sets feature more reinforcing ribs under the rim than other brands. These ribs add more strength to the rim which reduces twisting, bowing, and tears. The four stacking lugs on the sides prevent sticking while the item is nesting. Parade Plastics' sets feature re-curved handles molded into the box. This design allows for maximum comfort, efficiency, and safety in the work place and greatly reduces the stress on fingers and hands.

Parade's sets can be used for all sorts of tasks such as marinating meats and draining fruits and vegetables. Their large size allows them to contain a substantial amount of products helping to cut down on cleaning and storage cost.

Parade sets are available in 5 different colors to correspond with HACCP guidelines. You may order our food storage boxes in blue for seafood, yellow for poultry, green for produce and red for beef.

Parades sets are made from FDA approved plastic resins. They are NSF certified and dishwasher safe.

## Why buy Parade Buffet Items?

Parade utilizes high quality, FDA approved materials. We never substitute materials to reduce costs. Our products are dishwasher safe. Most are produced from BPA free material.

Parade salad crocks look and feel like the higher priced products; however, we utilize S.A.N. and polypropylene to optimize value and service life.

Parade Buffet Items are available in 13 standard colors and are impervious to food acids.

Pebbled bowls are offered in four different sizes. A whole display can be set using the smaller versions for individual portions and the larger version for an attractive center piece. 6 and 8 inch bowls are also available in durable polypropylene versions.

Parade S.A.N. ladles are offered in 8 1/2 and 12 1/2 inch lengths. Their 1 ounce bowl size ensures dispensing the appropriate condiment amount. The oval bowl provides a steady, controlled pour. The handles are molded at a 115 degree angle to prevent the ladle from slipping into salad dressing or other condiments.

Portion servers are produced with high quality S.A.N. materials and are available in 4 standard colors. The reinforced handles are resistant to cracking and breaking. Perforated versions are also available for serving product while leaving unwanted liquids behind.

# BUFFET ITEMS

Parade offers a wide variety of buffet items to meet your needs

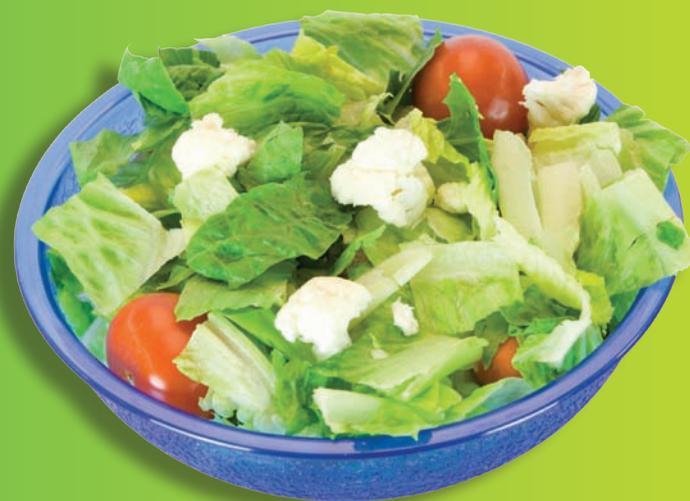

# PEBBLED BOWLS

Parade pebbled bowls are economical, attractive, durable, and break resistant. They are manufactured from either S.A.N. or polypropylene. The pebble design on the outside of the bowl will resist scratching and marring helping this item to continue to look like new. The inside surface of the bowl is smooth for easy cleaning. The seamless design will insure that food is not caught in any crevices.

Both materials are resistant to olive oil, vinegar, and mayonnaise. The pebble bowls will not stick to each other when nesting. Different sizes can be acquired with matching appearances to give your salad bar a unique and appealing look. These salad bowls feature a large lip around the circumference of the bowl allowing for a firm grip. The 15 oz. and the 8 oz. can be fitted with one of our container lids (sold separately) allowing it to be placed directly into the refrigerator after use. The bottom of the bowl levels out so that it is capable of standing without support. A glossy appearance on the inside of the bowl will help to give your product a clean and fresh look.

Parade pebbled bowls are made from FDA approved plastic resins. They are microwavable, and dishwasher safe.

The polypropylene bowls are available in nine standard colors. The S.A.N. bowls are available in four standard transparent colors.

# SALAD CROCKS

Parade Plastics' salad crocks are economical, attractive, durable, and break resistant. They are manufactured from high quality polypropylene or S.A.N. resins that give this product a ceramic look and feel without the cost. These materials are impervious to vinegar, mayonnaise, salad oil stains and will provide many years of reliable service. They feature a smooth inner and outer surface for easy cleaning. The seamless design ensures that food will not get caught in any crevices.

With the seven standard color options, Parade salad crocks will help give your salad bar an attractive, appetizing appeal. These salad crocks come standard with easy fitting lids, allowing you to store the product in the refrigerator after the presentation is complete. These lids feature two extended tabs on the sides for easy removal. The lids are transparent allowing the contents to be easily identified.

Our salad crocks come in three different sizes. Matching ladles and inserts can be purchased separately. All salad crocks are made from FDA approved plastics.

# SALAD CROCK INSERTS

Parade salad crock inserts are made from rugged, high quality polypropylene making this item resistant to breaking, chipping, cracking and warping. These salad crock inserts feature a smooth inner and outer surface for easy cleaning, and all corners and ends are rounded to insure that food will not accumulate in any crevices. The polypropylene feature makes this item resistant to a wide variety of temperatures (from 0 to 230 degrees) and is resistant to salad oils, vinegar and mayonnaise.

Salad crock inserts will help to cut down on food waste and will create an effective presentation by keeping your salad bar looking full and fresh. Parade's salad crock inserts fit easily and comfortably into the container and provide no resistance when being removed. Their design and colors help them to match the look of the bottom of the container making customers unaware of their presence.

Parade salad crock inserts come in three colors and two different sizes that are designed to fit the 1.2 qt. and the 1.5 & 2.7 qt. salad crocks. All salad crock inserts are made from FDA approved resins and dishwasher safe.

# ONE OUNCE SERVING LADLE

Parade Plastic ladles are made from high quality, durable S.A.N. making these items resistant to breaking, chipping, cracking and warping. These ladles feature a smooth inner and outer surface for easy cleaning. All corners and ends are rounded to insure that food will not accumulate in any crevices. Parade ladles are resistant to a wide variety of temperatures (from 0 to 230 degrees). All Parade ladles are resistant to food odors, food acids, olive oil, vinegar, and mayonnaise.

Parade ladles can be used for all products in the food service industry, not just salad dressing. The wide heat range of S.A.N. will allow this particular ladle to serve heated items such as pasta sauce, gravy, and melted cheese. The plastic feature will not let this ladle conduct heat like its metal counterparts. These ladles feature an easy grip angled handle that will clench the side of a container. This prevents the ladle from slipping into the condiment. A small one ounce reservoir allows dressing to be poured from either side of the ladle. This feature will provide you with a steady and controlled pour.

Parade ladles are offered in two different lengths (8 ½ in and 12 ½ in). Both ladles are made from FDA approved plastic resins and dishwasher safe.

# PORTION SERVERS

Parade Plastics' portion servers are manufactured from high quality, break resistant S.A.N. These servers come in three convenient sizes and two styles. They are a perfect accommodation for any restaurant that wishes to serve consistent, well portioned meals. Perforated portion servers are perfect to serve green beans, corn, and noodles. The S.A.N. material gives this item a crystal clear complexion and will resist temperatures between 0 and 230 degrees Fahrenheit.

Parade Plastics' portion servers are designed with a smooth inner and outer surface for easy cleaning. A well textured and tapered handle will prevent the server from slipping through your grasp. The handle is reinforced to resist breaking and warping. The portion server also features a set of holders, located towards the end of the handle to prevent it from sliding into the product being served. Perforated portion servers contain a well rounded circumference and high rising sides to help prevent dripping and spilling. A loop at the end of the handle allows you to conveniently hang it where the food is being served.

Each portion server measures 12 ½ inches in length. They are also dishwasher safe.

# BUSING AND UTILITY

## Why buy Parade Busing and Utility Products?

Parade Busing and Utility products feature a textured exterior surface that is resistant to scratching and marring. Their smooth interior surface features a rounded, seamless surface for easy cleaning.

Parade utilizes high quality FDA approved materials. We never substitute materials to reduce costs. Our busing and utility products are NSF certified and dishwasher safe. Most are produced from BPA free material.

Parade utility items feature more reinforcing ribs than our competitors. This helps to prevent twisting, tearing, and warping. Extra reinforcements are placed in between compartments for extra stability.

Stacking lugs are provided on Busing and Utility products, eliminating air vacuums. This feature helps to prevent bacteria growth when the product is stacked, reducing the risk of food borne illness.

Parade Busing and Utility products are impervious to food acids.

Parade Busing and Utility products feature re-curved handles. This ergonomic feature reduces stress on hands and wrists, providing safe and comfortable handling of heavy loads.

All products are molded to be durable, resisting the daily abuse due to busing, collecting, and transporting. Many sizes, shapes, colors, and density options are available to serve your needs.

Parade Busing and Utility products are price competitive.

# BUSING AND UTILITY

## Parade Busing And Utility Features

Graduations molded in the interior of utility pails

Stacking lugs eliminate air vacuum allowing easy separation and reducing odors

Seal tight lids for 12 gallon trash cans

Reinforcing ribs prevent twisting, tearing and warping

Reinforcements between compartments prevent flexing and collapsing

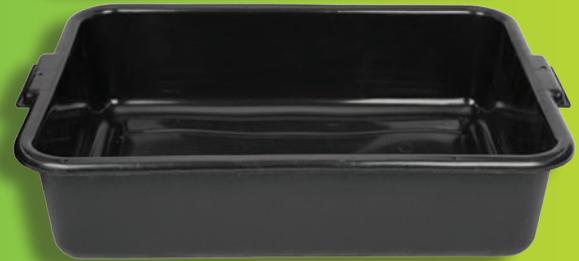

# STANDARD DUTY BUS TUBS

Parade Plastics' bus tubs are truly the strongest standard weight bus tubs available. They feature more reinforcing ribs under the rim than other brands. These ribs add more strength to the rim which reduces twisting, bowing, and tears. The four stacking lugs prevent sticking when nested.

Parade Plastics' bus tubs also feature re-curved handles molded into the box. They are designed for maximum comfort, efficiency, safety, and ease of use, especially in the work place. This ergonomic feature reduces stress on the fingers and hands while lifting heavy loads.

Parade bus tubs incorporate a textured outer surface which resists marring for a long and attractive service life. Thicker plastic corners reduce the possibility of wearing holes in the bottom, extending the life of the tub. The inner surface of a Parade tub is very smooth with a wide radius for easy cleaning.

Parade bus tubs may be used for bussing, storing, or transporting. They are available in black, brown, or grey, and in 5 or 7 inch depths. Optional contoured lids provide for parade boxes to be stacked on top of one another without leaning or collapsing.

Made in USA

# BUS BOX LIDS

Unlike our competitors, Parade Plastics offers bus box lids as a unique way to conceal unsightly items and odors when busing. Parade's bus box lids are manufactured from extremely durable, high-quality polyethylene, and are designed to fit any bus box whether heavy duty or standard. Our bus box lids feature a smooth inner surface for easy cleaning and removal of food waste. The textured outer surface will resist scratching and marring for a long and attractive service life.

When flipped upside down, the center of the bus box lid is pitched to allow water to accumulate around the sides and flow towards the handles. At the center of the handle is an opening that allows the accumulated water to escape. This allows the lid to dry quicker and will prevent bacteria from growing. The bus box lid is contoured to fit the bottom of the bus box allowing them to be comfortably stacked on top of one another. Matching ridges on the top of the lid and the bottom of the box helps to keep them from sliding when double stacked.

The bus box lid comes in one size and three standard colors. All bus box lids are made from FDA approved resins, NSF certified, and dishwasher safe.

# UNDER COUNTER BOX

Parade Plastics' under counter box is designed for all segments of the food service industry. They are manufactured from rugged, high quality polyethylene and are resistant to breaking, cracking, chipping, and warping. These boxes feature a smooth inner surface with a wide radius for easy cleaning. The plastic corners are molded thicker to reduce wear and tear, extending the life of this product. Parade under counter boxes incorporate a textured outer surface, which resists scratching and marring for a long and attractive service life.

Large handles on the side of the under counter box allow for a firm and secure grip. They are reinforced to prevent them from breaking under the pressure of heavy loads. The under counter box has a long, narrow profile so it fits in tight spaces. It has a maximum capacity of up to three gallons. The four stacking lugs, located on the sides of the item, prevent it from sticking when nested.

Parade under counter boxes may be used for busing, storing, or transporting. They are available in one size and three different colors: black, brown, and grey. Optional contoured lids allow for Parade boxes to be stacked on top of one another without leaning or collapsing.

The under counter box is made from FDA approved plastic resins, NSF certified, and dishwasher safe.

# UTILITY PAIL

Parade Plastics' utility pail is designed for all segments of the food service industry. They are manufactured from rugged, high quality polyethylene and are resistant to breaking, cracking, chipping, and warping. These pails feature a smooth inner surface with a wide radius for easy cleaning. Parade utility pails incorporate a textured outer surface, which resists scratching or marring for a long and attractive service life.

The utility pail contains graduations molded on the inside of the pail for easy mixing of cleaners and sanitizers. A bail is attached to heavy duty, reinforced extensions located on the sides of the pail. The plastic handle on the bail is molded with a rippled design, allowing for a firm, secure grip. The large lip around the circumference of the pail prevents these items from sticking together when nesting. The rim at the top of the bucket is designed with a well-rounded ravine that generates a steady, controlled pour.

The utility pail is available in three standard colors designed for three different functions. White is designed for food products such as ice cream, that is dispensed and stored at the end of the day. Grey is commonly used for cleaning and janitorial duties. Red is utilized for mixing sanitizers to clean surfaces that come in contact with food.

The utility pail is made from FDA approved resins and dishwasher safe.

Made in USA

# CUTLERY BOXES

Parade's divided cutlery boxes are perfect for any restaurant organization, large or small. These items are made from the best FDA approved plastics. We never substitute materials to reduce cost. Our cutlery boxes feature four separate compartments for organizing and transporting silverware.

Each compartment is intentionally designed with a smooth interior surface to allow a more efficient, easy cleaning. The outer surface features a textured design that is resistant to scratching and marring for a long and attractive service life. The individual compartments are rounded so silverware can be retrieved with ease. Reinforcements have been placed between each compartment for extra support and rigidity. The handles located on each side of the cutlery box are reinforced to prevent breaking. The smaller profile of this cutlery box will help to conserve much needed space when nesting.

The cutlery box is offered in one size and three standard colors and is dishwasher safe.

## Why buy Parade Accessories?

Parade utilizes high quality FDA approved materials. We never substitute materials to reduce costs. Our products are dishwasher safe. Most are produced from BPA free material.

Parade plate covers provide a low cost alternative to the higher price competition. Stacking lugs located around the sides allow for easy separation when nesting. Choose from 12 standard colors for an appetizing display to compliment any application.

Reinforcements along the ice scoop makes this product ridged and sturdy. The handle is tapered to prevent slipping.

Ingenuity in design and products make Parade one of the top plastic manufactures in the market. Parade is the only manufacturer to design trays particularly for wasabi and sushi dishes.

Parade accessories can be utilized in schools, hospitals, hotels, chain restaurants, correctional facilities, and many other organizations located throughout the food service industry.

Parade accessories are price competitive.

# MULTI-PURPOSE SCOOP

Parade Plastics' multi-purpose scoop is designed for all segments of the food service industry. They are manufactured from rugged, high quality polypropylene and are resistant to breaking, cracking, chipping, and warping. These scoops feature a smooth inner and outer surface for easy cleaning. All corners and ends are rounded to keep food from accumulating in any crevices. The plastic corners are molded thicker to reduce wear and tear, extending the life of this product.

The handle on the scoop is molded to fit your hand, allowing for a firm and comfortable grip. It is tapered to reduce the possibility of slipping and is reinforced to prevent it from breaking. The front of the scoop is angled, allowing food or ice to slide towards the back. The large reservoir allows a significant amount of food or ice to be held. A reinforced loop at the end of the scoop allows it to hang where the product is being served. Polypropylene gives this product a glossy, clean look. A temperature range of 0 to 230 degrees Fahrenheit allows this item to be used on heated products as well.

The scoop is resistant to food odors and stains. It comes standard in white, but can be manufactured in any color that is offered in our other polypropylene products (lead times and minimum order quantities apply).

The thirty-two ounce scoop is manufactured from FDA approved resins and dishwasher safe.

# NINE INCH PLATE COVERS

Parade's nine inch plate covers are economical, attractive, durable, and break resistant. They are manufactured from two different plastic resins: S.A.N. and polypropylene. They will not dent or tarnish like their metal counterparts. The plastic feature allows for a quieter, more peaceful atmosphere.

Parade's plate covers will help keep your food hot and appealing while waiting to be served. They help to prevent food from being contaminated by outside particles. Each cover contains a hole on the top for easy removal. This also helps prevent steam buildup. The plastic feature will not conduct heat like metal, allowing the cover to be cooler and safer to the touch. Stacking lugs are located on the side of the cover for easy separation when nesting. This creates airflow, which will generate a less suitable environment for bacterial growth. The crystal clarity of S.A.N. allows food to be easily identified without removing the cover. The economical price and multiple colors of polypropylene delivers a new, elegant look. The polypropylene also allows this item to be used in a microwave.

Parade's nine inch plate covers are available in two different styles and 11 colors. They are manufactured from FDA approved resins and dishwasher safe.

# Product Advantages

## clear storage containers:

- Are made of durable NSF certified and FDA approved plastic.
- Have molded-in, curved handles, stacking ledges and seamless construction for easy handling and cleaning.
- Can withstand temperatures as low as 0° F and up to 230° F.
- Are dishwasher safe.
- Include 20, 24, 32 and 40 quart options.  
Parade Plastics is the only brand to offer these sizes.

## tumblers:

- Are stiff, strong and durable.
- Feature good clarity stacking lugs to prevent bacteria growth and sticking.

## polypropylene plastic products:

- Feature good hot stamping.
- Are very flexible and won't break easily.
- Resist chemicals and heat up to 230° F.
- Can be recycled.

## polyethylene plastic products:

- Feature the same benefits as polypropylene products.
- Can be used in freezers down to -40° F.
